P BOOSTER® Components Mode of Action assists

WEIGHT LOSS, POOR APPETITE, DIARRHEA, COLIC, ILL HEALTH, POOR DIGESTION

Reducing stress reactions and stimulating immune and liver function

Reduction of gastric oxygen status to minimize effects of harmful bacteria

Prevention of pathogenic bacteria adhesion to the lining of the intestinal tract

Breakdown of complex starches, non-starch polysaccharides (fibers) and proteins

Increase in uptake of important vitamins, trace minerals, amino acids & fatty acids

Increase of organic acid production, improvement in feed digestion and absorption

Stimulation of gut and bowel micro organisms and balancing of intestinal microflora

Digestive problems and diarrhea, by assisting production of organic acids & stabilizing gastric pH

Promoting Anti-inflammatory reactions and providing anti-oxidant properties to reduce cell damage
